INTRODUCTION: DEFINING THE ENTRANCE

An entrance is more than an opening; it is a statement. It balances privacy with invitation, security with beauty, and durability with design. Our Outdoor Door Systems are engineered to master this balance. Offering a choice between the warm, natural aesthetic of Wood Plastic Composite (WPC) and the sleek, structural integrity of Aluminum, each door is a testament to precision manufacturing and thoughtful design. Available in manual or fully integrated automated configurations, they are the definitive solution for discerning homeowners and architects

NATURE, PERFECTED

Experience the timeless beauty of wood, re-engineered for eternity

ENGINEERED TO ENDURE. BUILT TO PROTECT.

Premium WPC Fence System | Certified. Tested. Trusted.

MATERIAL PHILOSOPHY

Our WPC (Wood Plastic Composite) doors are born from a commitment to sustainable luxury. By fusing recycled wood fibers with advanced polymers, we create a material that captures the deep grain, warm texture, and rich appearance of premium hardwood. This innovation liberates you from the constant maintenance, rotting, warping, and insect susceptibility inherent to natural wood, offering unparalleled longevity in any climate.

intertek
Total Quality. Assured.

INTERTEK CERTIFIED

Independently tested for performance, durability, and safety.

110 MPH HURRICANE RESISTANCE

Tested to withstand wind speeds up to 110 mph – Simpson Hurricane Wind Scale Category 2.

AFA CERTIFIED

Proudly certified by the American Fence Association for quality and structural integrity.

TOP-TIER PERFORMANCE

Designed for extreme weather.
Built for timeless beauty.

110 MPH
WIND RESISTANCE

WATERPROOF
& ROT-PROOF

UV RESISTANT
FADE DEFENSE

LOW MAINTENANCE
BUILT TO LAST

DESIGN & AESTHETIC

This collection brings organic warmth to modern living. The textured finish and realistic wood-grain detailing provide a tactile, authentic experience. It is the ideal choice for creating a seamless and inviting transition from home to garden, patio, or poolside, complementing both rustic retreats and contemporary landscapes

PRODUCT SPECIFICATIONS & OPTIONS

Double Door: For grand entrances and wide openings. 10' total width (typically configured as two 5' panels), 6' height

Double Door

Single Door: Designed for standard openings. Available in 3' width or 4' width, with a uniform 6' height

Single Door

Curated Color Palette: Choose from three sophisticated, low-maintenance finishes:

WALNUT

A deep, rich brown that exudes classic elegance

Curated Color Palette: Choose from three sophisticated, low-maintenance finishes:

BLACK

A bold, modern statement that frames the outdoors dramatically

Curated Color Palette: Choose from three sophisticated, low-maintenance finishes:

LIGHT GREY

A soft, contemporary neutral that brightens and enlarges the space

NEWGEN MATERIALS & DESIGN

PRODUCT ADVANTAGES

Tailor functionality to your lifestyle

Operation

Features robust, corrosion-resistant hinges and precision-machined latches for smooth, silent operation

Manual

For ultimate convenience. Our discreet, high-torque drive systems enable silent opening via remote, smartphone app, or integration into smart home ecosystems

Motorized/Automated

TECHNICAL HIGHLIGHTS

High-Density Core: Provides exceptional structural stability and resistance to impact.

UV-Stabilized Formulation: Colors resist fading, ensuring years of vibrant beauty.

Weather-Resistant: Impervious to moisture, preventing swelling, cracking, or decay.

Low Maintenance: Requires no annual staining, sealing, or painting – simple cleaning preserves its beauty

ARCHITECTURAL CLARITY

Where minimalist design meets formidable strength

MATERIAL PHILOSOPHY

Architectural-grade aluminum is the choice for modern precision. Renowned for its exceptional strength-to-weight ratio, it allows for stronger, slimmer profiles and larger glass expanses. Its innate resistance to corrosion makes it supremely durable, especially in coastal or harsh environments. Our doors are engineered for structural integrity, thermal performance, and flawless operation

DESIGN & AESTHETIC

This collection is defined by clean lines, sleek surfaces, and a commanding presence. It embodies a bold, architectural spirit, perfect for projects that demand a modern statement, maximum transparency, and a seamless connection to the outdoors. The result is an entrance that is both a secure barrier and a breathtaking frame for your view

THE FINAL STATEMENT

Your choice of an entrance defines the character of your home. Whether you are drawn to the natural elegance of our WPC Collection or the architectural precision of our Aluminum Collection, you are selecting a product built to the highest standards of craftsmanship, durability, and design. This is not merely a door; it is the first and lasting impression

Contact us to request detailed CAD drawings, material samples, or to consult with our specification experts

OUR INTEGRATED APPROACH

We provide complete entrance solutions. Our doors are designed to integrate seamlessly with complementary systems like WPC fencing, aluminum pergolas, and gate systems for a cohesive outdoor aesthetic. Our technical support team assists with specification, ensuring the right door, operation, and finish for your specific project requirements, climate, and design vision
